

SPECIFICATION SHEET

Solar Powered Mole And Rodent Repeller SA-01

Product Description:

The Solar Rodent Repeller works on gopher, vole, shrew and other destructive rodents. works in the garden, Lawn.

It chases away mole and other ground rodents with sound instead of poisons. This repeller emits an intermittent combination of underground sound and vibration every 30 seconds . That mole and other burrowing rodents can't stand. However, it won't disturb household pets.

The Advanced Solar Powered Mole Repeller has high-spec solar panels and an aluminum cannulation . The aluminum cannulation give more durability and makes it easier to insert in the soil. More importantly, aluminium is a better conductor of the repelling vibrations.

Effective Range: 650 M2 ; Frequency: 400 Hz

Rechargeable battery included: 1.2 V 600MAH Ni-MH

SOLAR PANEL : 2V/45MA ; Operation current : 6MA

Weight : 0.3KG

Case raw material : ABS , Aluminum cannulation (30cm)

Packing size :36.5×16.5×9 cm / PCS

Carton size : 54×37.5×35 cm / 12PCS The total weight 6KG

Carton size : 54×37.5×35 cm / 24PCS The total weight 12KG

Solar Mole and Mouse repeller Instructions:

How does the solar repeller work?

During the day, the solar panel converts solar power into electricity and stored in the rechargeable battery. So it works day and night.

How to install solar repeller work ?

Just connecting the wire inside by pushing the plug into the jack, it is ready to work. Then put the stake into the ground at the sunny spot. You will hear a beep sound. It's done.

If the repeller doesn't turn on automatically after a 6 hours of charge, please check the followings:

- 1) Check the battery to ensure that it is making correct contact with the terminals.
- 2) Make sure the repeller is placed in a sunny location and the solar panel is clean and facing the sun.
- 3) If the repeller stops working after it has been used for more than 18 months, the battery may be beyond its lifespan. You may change the battery (1.2V 600mAh AA Ni-MH battery).
